🔗 Portfolio 📄 Medium

PROFESSIONAL SUMMARY

Results-driven third-year ICT undergraduate with hands-on experience developing full-stack web applications, SaaS platforms, and business intelligence solutions using React.js, Node.js, Express.js, PostgreSQL, and MongoDB. Passionate about software engineering and DevOps, currently expanding expertise in Docker, Linux, and CI/CD. Seeking a Software Engineering Internship to contribute to real-world software development while continuously learning and sharing technical knowledge through Medium.

EDUCATION

Bachelor of Information and Communication Technology (Hons)

06/2023 – Present | Vavuniya, Sri Lanka

University of Vavuniya, Faculty of Technological Studies

GPA: 3.00 / 4.00

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Computer Networks, Cloud Computing

TECHNICAL SKILLS

Programming Languages – Java, Python, C, C++, C#, JavaScript (ES6+), PHP

Frontend Development – React.js, Vite, Tailwind CSS, HTML5, CSS3

Backend & APIs – Node.js, Express.js, RESTful APIs, Core PHP, JWT Authentication

Cloud & Databases – AWS, Microsoft Azure, PostgreSQL, MySQL, MongoDB, SQLite, Supabase

DevOps & Developer Tools – Git, GitHub, Docker, Linux, GitHub Actions, Postman, jsPDF, Nodemailer

PROJECTS

1. BizAnalytics – SaaS Business Intelligence & Executive Analytics Platform

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL (Supabase), SQLite, Recharts, Chart.js, jsPDF

- Developed a **SaaS-grade Business Intelligence platform** that transforms CSV/XLSX business data into interactive dashboards and executive reports.
- Built an automated **data ingestion pipeline** with validation, preprocessing, and synchronization using PostgreSQL (Supabase) and SQLite.
- Designed real-time KPI dashboards featuring Revenue Trends, Sales Analytics, Product Insights, and executive PDF reporting.
- Implemented secure RESTful APIs, resilient database connectivity, and a responsive Glassmorphism UI using React and Tailwind CSS.

2. PricePulse – E-Commerce Price Tracking Platform & Chrome Extension

Tech Stack: React.js (Vite), Tailwind CSS, Node.js, Express.js, MongoDB, Puppeteer, Cheerio, Chart.js, JWT, Bcrypt.js

- Developed a **full-stack e-commerce price tracking platform** with a Chrome Extension for real-time product monitoring.
- Engineered an automated **web scraping engine** using Puppeteer, Cheerio, and Node Cron to collect and manage pricing data.
- Integrated interactive price history charts and automated email notifications for price-drop alerts.
- Implemented secure authentication using JWT and Bcrypt.js while following RESTful API architecture.

3. ATMS – Attendance & Timetable Management System

Tech Stack: React.js (Vite), Tailwind CSS, Core PHP, REST APIs, MySQL

- Developed a **full-stack academic management system** for attendance tracking and timetable scheduling.
- Implemented **Role-Based Access Control (RBAC)** for Administrators, Lecturers, and Students.
- Built real-time attendance management, conflict-free timetable scheduling, and analytical dashboards.
- Designed a responsive, modular user interface using React.js and Tailwind CSS.

CERTIFICATIONS

AI Chatbot Development (OpenAI API Integration Focus) – 2026, Simplilearn / Certified

Python for Beginners – 2025, Simplilearn

IT Essentials – 2025, Cisco Networking Academy

PUBLICATIONS

Technical Articles – Medium

- Regularly publish technical articles and project walkthroughs on Software Engineering, Full-Stack Development, AI, and DevOps through Medium.
